

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Application made for transfer of office of entry to Utica, N. Y., as second-class matter.

ACTIVITY. Today, every walk in life has been divided and sub-divided. Oxford books reflect this progress both in their wide variety and ever increasing number.

A selection of those recently issued.

SPACE AND TIME IN CONTEMPORARY PHYSICS

By MORITZ SCHLICK

Net \$2.50

An adequate, yet clear account of Einstein's epoch-making theories of relativity.

ON GRAVITATION AND RELATIVITY

By RALPH ALLEN SAMPSON

90c

The Halley lecture delivered by the Astronomer Royal for Scotland.

SOME FAMOUS PROBLEMS OF THE THEORY OF NUMBERS

By G. H. HARDY

\$1.15

Inaugural lecture by the Savilian Professor of Geometry at Oxford.

TUTORS UNTO CHRIST

By ALFRED E. GARVIE

Net \$2.25

An interesting introduction to the study of religions.

FUNGAL DISEASES OF THE COMMON LARCH

By W. E. HILEY

\$5.65

An elaborate investigation into larch canker with descriptions of all other known diseases of the larch and numerous fine illustrations.

THE GEOGRAPHY OF PLANTS

By M. E. HARDY

\$3.00

More advanced than the author's earlier work discussing fully the conditions in which plants flourish and their distribution throughout the earth.

SCHOOLS OF GAUL

By THEODORE HAARHOFF

\$5.65

An important study of Pagan and Christian education in the last century of the Western empire.

THE ELEMENTS OF DESCRIPTIVE ASTRONOMY

By E. O. TANCOCK

\$1.35

A simple and attractive description of the heavens calculated to arouse the interest of those who know little or nothing of the subject.

RECENT DEVELOPMENTS IN EUROPEAN THOUGHT

Edited by F. S. MARVIN

Net \$3.00

Twelve essays by noted scholars summarizing the work of the leading European thinkers in the last fifty years.

DEVELOPMENT OF THE ATOMIC THEORY

By A. N. MELDRUM

70c

A brief historical sketch attributing to William Higgins, not John Dalton as generally supposed, priority in the discovery of the theory.

At all booksellers or from the publishers.
